

I support a limited deregulation. Ownership should be limited to no more than 5 entities in any one state of the union. Would allow a more flexible ownership rate, but not shift all the way to unfettered purchasing power to anyone who wanted it.

I'd hate to see all media owned by 10-12 entities nationwide. Would stifle independent newspapers and lessen the role of the press in our society, which is something I believe the founding fathers would have frowned on.

Thanks for listening.
